Re: Park Valley, Utah Turquoise Stone Quarry Mining Plan.

Greetings,

Please find enclosed two copies of our revised mining plan to comply with the latest 3809 regulations and our settlement with the B.L.M. dated November 17, 2004. We have made an extra effort and spent a considerable sum of money in order to expedite the revisions to the mining plan so there would be no reasons for delay in being able to start our quarry in a fully operational manner by April 2005.

During 2004 we invested over \$700,000.00 in quarry development, new equipment, infrastructure and permitting in order to be able to meet the pent up demand for our products resulting from expansion delays over the course of the past 10-12 years. I would appreciate it if you would expedite the review of our revised mining plan so we can move forward in the early spring, without further loss of revenue.

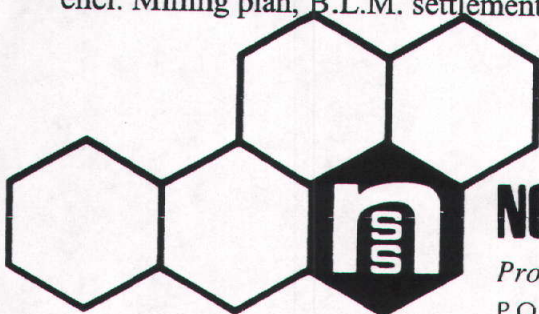

I am looking forward to a long, amicable and fair relationship with the B.L.M. and it's employees. This will allow both parties to work efficiently and in an economically sound way to allow us to put our energy and resources into helping an ailing world. If you have questions or would like to meet me and my consulting firm for any clarification, please give me a call.

Sincerely,

Gary Mullard
